

Proposed Criteria to Influence Order of Community Meetings	
Data	Demographic Vulnerability Index
Priority 1: Real time (current) sampling data, air and soil Priority 2: Moss data- Verified Priority 2: Past air sampling data and monitoring - NATA, PATS, EPA, Toxic Release Inventory No Priority- unverified moss data	Composite Index: Age, Income, Communities of Color (proposed)
Proposed Process	
Priority 1: Criteria from <b>both</b> data and Vulnerability Index is present Priority 2: Verified data of area of concern - DEQ data- metals only- (air and soil), OR NATA cancer risk from HAP's is 90 <sup>th</sup> percentile or greater (proposed) Priority 3: Demographic Vulnerability Index showing households residing top 1/3 of children, communities of color (tracts identifying as greater than or equal to 15%) and tracts with greater than (city or county) poverty level. Would apply to area within ½ mile of identified tract.	

Raised additional criteria: Political influence, resource availability (re: what would be required for large vs. small event)
